ADDENDUM #2

To: ALL PROSPECTIVE FIRMS

Re: INVITATION FOR BIDS: **RFP 15-036-CW Fleet and Fuel Management Solution**

The Invitation for Bids, referenced above, is modified as follows:

1. The response deadline has been extended to **Thursday, May 7, 2015 @ 12:00 noon.**
2. **Should the proposal include the replacement of the existing GasBoy fuel management system including all hardware and software? This question is asked to ensure that another manufacturer's system (other than GasBoy) can be proposed.** The proposal calls for replacing the card and key reader at all 5 locations. Yes you can propose any system that will be suitable for the RFP.
3. **Will any or all of the fuel islands be connected to a computer network or will communications be through a dial-up system?** A dial-up system will be used.
4. **Is the server where the fuel management software will reside located at one of the 5 sites or elsewhere?** A designated dial-up line for each respective (5) fueling sites. The main station is at 1122 7th street, Macon Ga, 31206. This is the location for the server.
5. **Are there any tank monitoring systems to be interfaced (to allow levels to be viewed using the proposed fuel management software) with the fuel management system? If so, will they be on the same computer network as the fuel management system?** Each location dials into a Veeder Root monitoring system, and they are all on the same network.

Please incorporate this change into the Invitation for Bid and acknowledge receipt of this addendum on your bid form.

Sincerely,

Chauncey Wilmore
