15. TITLE - MACON-BIBB URBAN DEVELOPMENT AUTHORITY

16. FOR THE

17. MILL HILL ARTS VILLAGE

18. MACON, GA 31201

19. APRIL 2018

20. PARALLEL PARKING WILL BE ADDED ON HYDROLIA STREET AND SCHELL AVE. BOTH OF THESE CITY STREETS WILL BE CONVERTED WITH SIGNAGE AND PAVEMENT MARKINGS INTO ONE-WAY STREETS.

21. THE PROJECT SITE IS LOCATED WITHIN THE CITY OF MACON, GEORGIA. THE MILL HILL ARTS PROJECT CONSISTS OF SITE IMPROVEMENTS TO AN EXISTING NEIGHBORHOOD TO ADD PEDESTRIAN AND VEHICULAR ACCESSIBILITY. ADDITIONALLY, THE MILL HILL ARTS PROJECT WILL BE USED AS THE CENTRALdestination FOR THE MILL HILL ARTS VILLAGE.

22. Earthworks shall be performed in accordance with the approved Earthwork Plan.

23. The contractor shall be responsible for the safekeeping of all tools, equipment, and materials delivered to the site.

24. The contractor shall be responsible for the safekeeping and protection of the site during all phases of construction.

25. The contractor shall be responsible for the clean-up of the site upon completion of construction.

26. All work shall be performed in accordance with the approved plans and specifications.

27. The contractor shall be responsible for obtaining any necessary permits and approvals.

28. The contractor shall be responsible for the procurement of all materials and equipment.

29. The contractor shall be responsible for the coordination and scheduling of all work.

30. The contractor shall be responsible for the provision of all labor.

31. The contractor shall be responsible for the provision of all safety equipment and supplies.

32. The contractor shall be responsible for the provision of all tools and equipment.

33. The contractor shall be responsible for the provision of all necessary services.

34. The contractor shall be responsible for the provision of all necessary utilities.

35. The contractor shall be responsible for the provision of all necessary transportation.

36. The contractor shall be responsible for the provision of all necessary椿 amazingly this isn't in my champ! etc
Vehicles shall be cleaned of accumulated soil prior to exiting the construction site to a public right of way. No mud or soil shall be tracked off-site.

Non-exempt activities shall not be conducted within the 25- or 50-foot undisturbed stream buffers as measured from the point of wrested vegetation without first acquiring the necessary variances and permits. A vegetative plan, noting temporary and permanent vegetative practices, is depicted on Sheet 7. The installation of these practices must, at a minimum, meet the guidelines set forth in the Manual for Erosion and Sediment Control in Georgia.

Erosion control measures shall be maintained at all times. If full implementation of the approved plan does not provide for effective control of sediment, additional control measures and temporary sediment control covers shall be employed to control the erosion problem.

No petroleum products shall be stored and used in an area that lacks a secondary containment feature, and shall be located in an area with the lowest practicable impact on the environment. Changes in underground storage tanks for the standards established by the Department of Natural Resources and the Environmental Protection Division shall be permitted for an additional fee.

I hereby authorize the following engineers to act as my authorized agent, under my direct supervision:

- James D. Wallace

All petroleum products shall be stored and used in an area that provides a secondary containment feature, and shall be located in an area with the lowest practicable impact on the environment.

Any disturbed area left exposed for a period greater than 14 days shall be stabilized with mulch or temporary seeding. The escape of sediment from the site shall be prevented by the installation of erosion and sediment control measures prior to land disturbing activities.

No alternate BMP's are proposed in this plan. Detailed drawings for all structural practices are depicted on Sheet 7. The installation of these practices must, at a minimum, meet the guidelines set forth in the Manual for Erosion and Sediment Control in Georgia.

The Level II certification number and seal of the certified Design Professional can be found on each sheet pertaining to construction projects as published by the Georgia Soil and Water Conservation Commission on January 1, 2018.

The construction activity includes BMP installation and construction of pedestrian site improvements for the renovation of this plan. The construction activity includes BMP installation and construction of pedestrian site improvements for the renovation of this plan.

Disturbed acreage of project area:

Total acreage of project area:

A vicinity map showing site's relation to surrounding areas is depicted on the Title Sheet. Existing and proposed contour lines are depicted on this Sheet. Contour lines are drawn at an interval of 1'. The existing contour lines are based on a field run survey by Donaldson, Garrett, & Associates.

A description and chart or timeline of the intended sequence of major activities which disturb soils for the major portions of the site (i.e., initial measures and practices prior to land disturbing activities).

The initial and/or revision date of this plan is depicted on the title block of each plan sheet. A notation shall be made on each sheet pertaining to the construction activity included in BMP installation and construction of pedestrian site improvements for the renovation of this plan.

There are no state waters buffers impacts proposed for this plan. The escape of sediment from the site shall be prevented by the installation of erosion and sediment control measures prior to land disturbing activities.

There is no spill or leak, contact First Environmental Nationwide toll free at (888) 720-1330.

If full implementation of the approved plan does not provide for effective control of sediment, additional control measures and temporary sediment control covers shall be employed to control the erosion problem.

Erosion and Sedimentation Control Plan

1. This plan has been prepared by the Design Professional, and a Linear Sketch of the property is provided on the Title Sheet of each plan sheet.
2. The technical sketches as shown and noted on the certified Design Professional sheet are based on the survey in the field indicated in the Title Sheet of each plan sheet.
3. All rights, licenses, and permits required for the construction of the project are obtained by the owner of the property.
4. The escape of sediment from the site shall be prevented by the installation of erosion and sediment control measures prior to land disturbing activities.
5. The plan has been prepared by the Design Professional, and a Linear Sketch of the property is provided on the Title Sheet of each plan sheet.
