Walnut Street Improvement Project

Location: The project area consists of all land that is Walnut Street and sidewalks between MLK and 7th Street terminating at Willie Smokie Glover Drive and all land that is owned by Macon-Bibb from the railroad tracks to 7th Street.

Project Description:

Phase I: Construction of a parking lot containing approximately 350 parking spaces. The parking lot will include sidewalks both within the parking lot and around the exterior of the parking lot, a dedicated bike lane through the parking lot, retention ponds, lighting and landscaping.

Phase II: The demolition and replacement of Walnut Street from MLK to 7th Street. The new construction will include a dedicated two-lane bike lane so bike traffic can enter and exit the Park. The construction of new sidewalks, including a sidewalk under the trestle going to MLK. The new construction will align with the parking lot and include lighting and landscaping.

Schedule: Phase I to be completed as soon as possible

Phase II – meetings to coordinate with the existing utilities in / around Walnut Street will proceed. The utilities may impact the final design. Final design will begin when all potential utility conflicts have been resolved.
